

NHS Test and Trace: COVID-19 testing for Students

Dear Parent or Guardian,

Asymptomatic testing will resume in the autumn term for all education workforce staff in Early Years, primary, secondary and FE settings as well as for students of secondary age and above.

Up to one third of people who have coronavirus are asymptomatic. By testing we will help to reduce the spread in school and college settings through asymptomatic transmission. We are therefore strongly encouraging those returning to Weymouth College to participate in testing.

Plan for testing

Staff are encouraged to test twice-weekly starting the evening or day before the return to college.

The college will offer students two LFD tests at an on-site Asymptomatic Test Site (ATS), 3-5 days apart.

Following the two initial on-site tests, students will be able to collect their home test kits and continue twice weekly testing at home.

How the tests work

Those taking the test will be supervised by trained staff and volunteers. The lateral flow tests are quick and easy to undertake, using a swab of the nose and throat. Results (which take around half an hour from testing) will be shared directly with the individual participant. The college will inform the student of a positive test result. Where participants are under 16, parents or legal guardians will also be informed. The student will also receive a text or email notification of a positive or negative result from the online NHS system.

What if my child tests positive?

If a pupil tests positive on a lateral flow device, they will need to self-isolate immediately and a [confirmatory PCR test](#) ordered. The confirmatory PCR test should be taken within two days of the positive LFD test. If the confirmatory PCR is also positive, follow guidance from NHS Test and Trace and continue to self-isolate.

If the confirmatory PCR is negative the pupil can stop self-isolating and return to school.

Should a confirmatory PCR not be obtained the pupil should self-isolate for 10 days from the result of the positive lateral flow test.

What happens if the test is negative?

While a small number of pupils may need to repeat the test if the first test was invalid or void for some reason, pupils who test negative will be able to stay in college and resume their activities as normal. Pupils will be informed of negative test results via text/email. Where participants are under 16, parents or legal guardians will also be informed.

What if staff or students have been in close contact with someone in college who tests positive?

NHS Test and Trace will work with the positive case and/or their parents to identify close contacts. This is likely to be a small number of individuals who would be most at risk of contracting COVID-19 due to the nature of the close contact. As parents or carers, you may be contacted to help with identifying close contacts.

Individuals are not required to self-isolate if they live in the same household as someone with COVID-19, or are a close contact of someone with COVID-19, and any of the following apply:

- they are fully vaccinated
- they are below the age of 18 years and 6 months
- they have taken part in or are currently part of an approved COVID-19 vaccine trial
- they are not able to get vaccinated for medical reasons

Instead, NHS Test and Trace will inform affected individuals, children or their parents or carers that they have been in close contact with a positive case and advise them to take a PCR test. We would encourage all individuals to take a PCR test if advised to do so.

Whilst waiting for the PCR test result, staff who do not need to isolate and children and young people aged under 18 years 6 months who have been identified as a close contact should continue to attend school as normal.

What if my child develops symptoms?

This testing programme at Weymouth College is for people with no symptoms. If your child develops symptoms at any time (including a high temperature; a new, continuous cough; or a loss or change

to their sense of smell or taste) they must immediately self-isolate and book a test by calling 119 or visiting <https://www.gov.uk/get-coronavirus-test>.

We will support our staff and pupils throughout, but please contact us if you have any questions. You can contact the office by [insert contact details].

Should I still take part in the asymptomatic testing programme if I have recently tested positive for COVID-19?

If a child has tested positive on a PCR in the last 90 days they should not participate in the return to school testing, as there is a risk it could display a false positive result.
